

Readi-Cat Instructions for CT of the Abdomen and/or Pelvis

Your doctor has ordered a CT Scan of your abdomen and/or pelvis. It is important to coat your GI tract so we can visualize it clearly on the images.

You may only have clear liquids and no solid food 4 hour prior to your scan time.

Drink 1st Bottle of Readi-Cat 2 Hours Prior to your scan time. Finish it entirely.

Drink 2nd Bottle of Readi-Cat 1 Hour Prior to you scan time. Finish ½ (50%) of this bottle.

Bring the remaining ½ of your 2nd Bottle with you to ADI and finish entirely here in our lobby.

You may chill the Readi-Cat or, if you prefer, drink it at room temperature. You may also drink water at any time during this time period.

If you have any questions, please call our imaging staff at **(717) 337-5991**.
